ADVANCED LAPAROSCOPIC SURGERY FOR HERNIA, WEIGHT-LOSS & GI CONDITIONS

**Leaders in advanced laparoscopic and
general surgery, excelling in complex procedures.**

Expert surgeons delivering advanced laparoscopic and reconstructive procedures for complex hernias, obesity, and gastrointestinal disorders using precision 4K surgical technology.

General Surgery, Hernia & Bariatric Surgery

Comprehensive Minimally Invasive Surgical Care

Our surgical program provides specialized treatment for complex hernia repair, abdominal wall reconstruction, bariatric surgery, and gastrointestinal disorders. Advanced laparoscopic techniques ensure safer procedures, minimal discomfort, shorter hospital stay, and faster return to daily life for international patients.

Hernia & Reconstruction

Complex Hernia & Abdominal Wall Repair

- Laparoscopic and open repair for inguinal, ventral, incisional, and recurrent hernias
- Advanced abdominal wall reconstruction for large and complex hernias
- Component separation and reconstructive surgical techniques

Bariatric & GI Surgery

Weight-Loss & Advanced GI Surgery

- Sleeve gastrectomy, gastric bypass, mini-gastric bypass, and revision bariatric surgery
- Minimally invasive surgery for gallbladder, appendix, colorectal disorders, and reflux disease
- Hepatobiliary and pancreatic surgery for liver, pancreas, and bile duct conditions

Day-Care & Laser Procedures

Advanced Day-Care Surgical Solutions

- Laser treatment for piles, fissure, fistula, and pilonidal sinus
- Short hospital stay and rapid recovery
- Structured nutrition and post-surgical recovery programs

World-class surgical expertise providing comprehensive treatment solutions for patients from around the globe
