## DEPARTMENT OF ONCOLOGY

**Advanced Cancer Care for Global Patients**

World-class cancer care combining advanced surgical oncology, minimally invasive techniques, and precision medical therapies to deliver personalized treatment and improved survival outcomes.

## Multidisciplinary Cancer Care Excellence

Our oncology program provides comprehensive cancer diagnosis and treatment supported by advanced imaging, molecular diagnostics, and multidisciplinary tumor board planning. International patients receive personalized treatment strategies designed for safer procedures, faster recovery, and optimal outcomes.

## Surgical Oncology

### Advanced Cancer Surgery

- Complex cancer surgeries for breast, gastrointestinal, thoracic, gynecologic, urologic, and head & neck cancers
- Organ-preserving and minimally invasive surgical techniques
- Robotic and laparoscopic tumor removal for precision surgery and faster recovery
- HIPEC and other latest advancement

## Medical Oncology & Precision Therapies

### Personalized Cancer Treatments

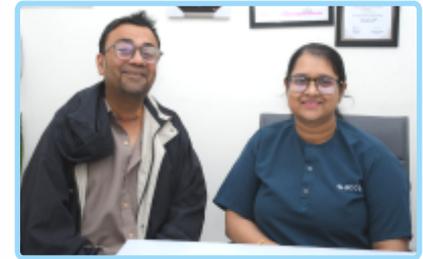

- Advanced systemic therapies: chemotherapy, immunotherapy, targeted, hormonal, and biologic treatments
- Precision oncology with genomics-guided, biomarker-driven personalized treatment
- Multidisciplinary tumor board–based cancer management
- Modern daycare oncology with international infusion safety and central line expertise
- Molecular diagnostics, NGS profiling, and liquid biopsy–based monitoring
- Complex and metastatic cancer care, rare tumor management, and international second opinions

## Comprehensive Cancer Programs

### Specialized Cancer Treatment Programs

- Breast, lung, liver, pancreas, and colorectal cancers
- Prostate, ovarian, kidney, and blood cancers
- Brain and spine tumor oncology programs
- Integrated rehabilitation and survivorship care
